[Section 5 Training and Education](#) [1]

The purpose of the Training and Education program is to ensure that workers are adequately trained and educated on the identification of workplace hazards, effective control measures, and how to perform work tasks safely and effectively.

All workers are required to complete a BCCF Safety Orientation before project work starts. BCCF will ensure training requirements are established and verified. BCCF will continue to improve the Training and Education program to ensure it meets the legislated requirements and industry best practices.
